

TractorMat

We are the first company of our kind, using reverse 3D engineering to make laser-measured, custom-fitted mats for a variety of farming equipment, including tractors, combines, sprayers and side by sides, guaranteed to fit perfectly.

Seward, NE 68434

Markets: US, Canada, Australia, New Zealand, Western Europe, South America

Products Offered

We have mats for most new and older John Deere, Case IH, and New Holland equipment as well as a few mats for Claas and Kubota.

TractorMat, founded in 2016, is a start-up company based in Seward, Nebraska. We partner with over 600 farm equipment dealers, cooperatives, and seed companies among other types of agriculture companies. Customers choose to partner with us because of our world-class quality, the value farmers and ranchers find in our products along with our remarkable customer service.

Farmers and ranchers love our mats as they save them tons of time and money keeping their cabs clean; they are light-weight, durable and easy to take out, power wash and re-install in moments. We are able to customize our mats with names and logos, thus, providing a creative and cost-effective way for organizations to advertise and market their brand, as well as providing their customers a high-end gift as a token of appreciation.
