

# **Pesticide Label Query: Warning Sign Posting Requirements (excludes structural/fumigation products)**

This list is intended to be used by applicators, extension educators, crop advisors, and other pesticide users as an aid in identifying pesticide products where posting is required for protecting field workers or the public. NDA has made every attempt to assure that the labels presented here are both accurate as to the label statement indicated, and as to registration status with NDA at the time of the search. However, because this search was not done directly with NDA's registered pesticide database, each language category does not represent a complete list of the products registered in Nebraska. The actual language of the products shown here may also be different from the product label that is registered in Nebraska. In addition, pesticide products are continually being added and deleted from our database, and the potential exists for this list to be outdated soon after it is created. Because of this, and because it's the law, it is still the responsibility of the pesticide applicator to use products registered in Nebraska, and to read and follow the label of the product to be used.

This document was developed using an "exact text" search offered by Kelly Registration Systems (<http://www.knowtify.net>). References to products, services, and other material not prepared by NDA in this document should not be considered an endorsement by NDA, nor is NDA responsible for the content of referenced material.

**Search criteria: "posting warning signs" and "entrances to treated areas"**

| Product Name                                     | EPA Reg. Num.  | Active Ingredient(s)*            | Example Label Statement**<br>Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas. |

\* - The common names of active ingredients are listed when given by Kelly Registration System. To check for active ingredients not shown, visit NDA's Registered Pesticide Database, found near the bottom of <http://www.agr.ne.gov/division/bpi/pes/pest1.htm>, and search for a product using the product name or EPA registration number. This site can also be used to view the "EPA stamped label" for products registered in Nebraska; however, variations in this label can exist on the actual product.

\*\* - The label statement shown here, or a slight variation, applies to every product in this section, or until another statement is shown. If this space is blank, the last statement shown applies to this product.

NDA values your input concerning this document. If you see errors in the pesticide products or label statements found here, if there are similar statements found on labels that could be included in this document, if there would be a benefit to having similar listings for other types of label statements, or if you simply have questions, please contact us at [webmaster@agr.ne.gov](mailto:webmaster@agr.ne.gov).
