

NEBRASKA SOIL AND PLANT TESTING LABORATORIES
Revised - 11/12/2008

The Nebraska Department of Agriculture (NDA) Laboratory Division administers the Nebraska Soil and Plant Analysis Laboratory Act: Neb. Rev. Stat. §§2-3101 to 2-3110.

Each laboratory which operates in the State of Nebraska performing soil and plant analysis for others must be registered with NDA. Each laboratory must maintain a written quality assurance program and each laboratory is inspected biennially by NDA for personnel qualifications, equipment, methods, and procedures. Specifics are found in Title 36 of the Nebraska Administrative Code, Chapter 1, entitled "Nebraska Soil and Plant Analysis Laboratory Act Regulations." In addition, each laboratory must participate in a proficiency testing program specified by NDA and NDA evaluates the testing results to determine if each laboratory's analysis is accurate within an acceptable range.

The following laboratories operating in the State of Nebraska are in compliance with the provisions of the Nebraska Soil and Plant Laboratory Act and implementing regulations. The State does not certify that individual analytical sample test results provided to a laboratory's customers are accurate, nor does the State certify that fertilizer recommendations based on a laboratory's test results are appropriate for a customer's specific needs.

AgSource Harris Laboratories
Steve Frack, Vice President
300 Speedway Circle, Suite 2
Lincoln, NE 68502
